Professor Jarosław Milewski,
Editor-in-Chief, Journal of Power
Technologies

Dear Professor Milewski,

I would be grateful if you would consider for publication in Journal of Power Technologies the paper entitled “An evaluation of the possibilities of using turboexpanders at pressure regulator stations.”

This manuscript has not been published and is not under consideration for publication elsewhere. The data about flow parameters in the pressure regulator stations belong to Polish national gas transmission system operator GAZ-SYSTEM S.A. All the results from our calculations are our intellectual property, the copyright of which can be transferred to Institute of Heat Engineering.

Thank you for the attention that you provide to this submission.

Yours sincerely,

Maciej Chaczykowski
